EDUCATION

The Ohio State University

Dec. 2023

Bachelor of Business Administration, Management Information Systems

Columbus, OH

PROJECTS

E-Commerce Sales Analysis (SQL + Tableau)

Mar. 2026

Analyzed 539K+ e-commerce transactions across 38 countries to uncover revenue patterns and operational risks.

- Identified a 99% revenue surge from August–November using SQL time-series queries (CTEs, window functions), informing Q4 inventory and marketing timing strategies
- Profiled top 10 high-value customers including one generating \$280K annually to surface concentration risk and recommend a wholesale account retention program
- Built an interactive Tableau dashboard with drill-downs by region, customer segment, and product category, delivering four strategic recommendations for inventory planning and international expansion into Germany and France

WORK EXPERIENCE

The Ohio State University

Jan. 2022 – Jan. 2023

Student Analyst, IT & Systems Support

Columbus, OH

- Tracked and analyzed 20–30 technical cases per shift across a 150,000+ user system, maintaining structured KPI logs and escalation records
- Identified recurring system issues through ticket data analysis and communicated findings cross-functionally to IT staff and department leads to support process improvements
- Delivered client-facing support with strong documentation and communication standards, improving resolution clarity and follow-through

Forno Kitchen + Bar

Aug. 2023 – Mar. 2026

Server

Columbus, OH

- Managed \$2,000–\$3,000 in sales across 80+ guests per shift, maintaining order accuracy and upsell consistency to drive above-average revenue per table
- Translated real-time operational metrics such as table pacing, order volume, and revenue targets into on-the-fly service decisions, developing analytical thinking applicable to business operations roles

Raising Cane's

Mar. 2019 – Dec. 2021

Certified Trainer, Kitchen Specialist

Columbus, OH

- Trained and evaluated new crew members using performance metrics to identify skill gaps and ensure adherence to operational standards
- Maintained sub-3-minute service targets for 300+ daily customers through efficient, data-aware workflow coordination and real-time team communication
